REGULAR PAPERS

Thermodynamics and Calorimetry

Etude cinétique de la dégradation thermique d'un copolymère de cyanure de vinylidène et de cyanovinylacetate
M. Raihane, N. Laleque and B. Boinon (Saint-Etienne, France) 1

Calorimetric investigation on the formation of gold nanoparticles in water/AOT/*n*-heptane microemulsions
F. Aliotta (Messina, Italy), V. Arcoleo, S. Buccoleri, G.L. Manna and V.T. Liveri (Palermo, Italy) 15

Gases evolved in the thermal decomposition of potassium cobalt hexacyanoferrate (II)
J. Lehto, M. Pettersson, J. Hinkula, M. Räsänen and M. Elomaa (Helsinki, France) 25

Calorimetric studies on actin polymerization and a comparison of the effects of cisplatin and transplatin
Z. Huihui, W. Baohuai, Z. Youming and W. Kui (Beijing, People's Republic of China) 31

Water-diol mixtures as solvents of electrolytes. Part 1. Enthalpies of solution of $NaBPh_4$ and Ph_4PCl in water with ethanediol-1,2, propanediol-1,2 and butanediol-1,2
A. Pietrzak, B. Nowicka and S. Taniewska-Osińska (Lódź, Poland) 39

Excess enthalpies for the ternary mixtures phenol–1-hexanol–*n*-heptane and phenol–cyclohexanol–*n*-heptane, and their constituent binaries at 318.15 K
H. Kirss, M. Kuus, E. Siimer and L. Kudryavtseva (Tallinn, Estonia) 45

Cryoscopic behavior in acetamide–zinc acetate dihydrate melts
R.M. Nikolić and M.D. Marinković (Belgrade, Serbia) 55

Excess molar enthalpies of cyclohexane + *n*-alcohols at 283.15, 298.15, 323.15, 343.15 and 363.15 K and at a pressure of 0.4 MPa
B. Löwen and S. Schulz (Dortmund, Germany) 63

Thermochemistry of lead 2,4- and 4,6-dinitroresorcinol
J.R. Payne (Egham, UK) 73

Influence of selected variables on heat of fusion determinations by oscillating DSC
M. Aldén, M. Wulff and S. Herdinius (Uppsala, Sweden) 89

Thermal Analysis

Characterization of acidity in $AlPO_4$–Al_2O_3 (5–15 wt% Al_2O_3) catalysts using pyridine temperature programmed desorption
J.M. Campelo, A. Garcia, D. Luna, J.M. Marinas and A.A. Romero (Cardoba, Spain) 103

Investigation of low-temperature autooxidation processes in bituminous coal lithotypes
K. Markova, N. Shopova and S. Valčeva (Sofia, Bulgaria) 111

Thermal conductivity measurements of *cis*- and *trans*-decahydronaphthalene isomers using a steady-state coaxial cylinders method
D. Frezzotti, G. Goffredi and E. Bencini (Mantova, Italy) 119

Tetraethoxysilane, $Si(OC_2H_5)_4$: vapour pressure measurements at temperatures from 323 to 442 K by means of a Bourdon spoon gauge
M.G.M. van der Vis and E.H.P. Cordfunke (Petten, The Netherlands) 129
Water desorption and aragonite–calcite phase transition in scleractinian corals skeletons
N. Passe-Coutrin, P. N'Guyen, R. Pelmard, A. Ouensanga and C. Bouchon (Point à Pitre, France) 135
Polymorphism in tripotassium lanthanate hexafluorides (Ln = Sm, Eu, Gd, Tb and Er)
B.N. Wani, M.D. Mathews and U.R.K. Rao (Bombay, India) 141
Contribution to the study of the reaction of mercury with platinum and a platinum–iridium alloy
F.L. Fertonani, A.V. Benedetti and M. Ionashiro (São Paulo, Brazil) 151
The effects of scan rate and protein concentration on DSC thermograms of bovine superoxide dismutase
D. Grasso, C.L. Rosa, D. Milardi and S. Fasone (Catania, Italy) 163
Thermogravimetry of a kaolinite–alunite ore
L. Piga (Rome, Italy) 177
Studies on the reaction of ammonium fluoride with lithium carbonate and yttrium oxide
E. Kowalczyk, R. Diduszko, Z. Kowalczyk and T. Leszczyński (Warsaw, Poland) 189
Isothermal study of the formation mechanism of 2223 phase in BPSCCO and BPSCCO–10 wt% Ag precursors
M.T. Malachevsky and D.A. Esparza (San Carlos de Bariloche, Argentina) 197
Description of the concentration and temperature-dependent mixing enthalpy of binary metallic melts
K. Schaefers, J. Qin, M. Rösner-Kuhn and M.G. Frohberg (Berlin, Germany) 209

Other Topics
Investigation of the chromium oxide system by means of temperature-programmed reduction
L.I. Ilieva and D.H. Andreeva (Sofia, Bulgaria) 223
